Dear Naomi,

As a Front End Engineer who loves building great products and appreciates great documentation I was thrilled to see an opportunity on LinkedIn to join the ReadMe team. What excites me most about joining your team is the fact that you put ReadMe's culture front and center and it sounds great! Who else lets you insert yourself on the Team page of the website wearing owl glasses and apply using an API call? You made me smile just thinking of applying and that says to me that you're doing something I want to be a part of.

I have been developing software for over 3 years and I have made a point to develop a wide and diverse set of skills so I can deliver the best possible applications and user experience. To the Front End Engineer position, I can bring:

- Solid skills with JavaScript, React, and CSS.
- Experience using Python and Django.
- A strong background in consumer-facing web applications.
- Strong understanding of version control & git.

In addition to my expansive skills in Frontend Development, I possess certificates in Software Engineering, Computer Science and *Data Science & Machine Learning in Python* from General Assembly, HarvardX & Udemy, respectively. As Software Engineer for Flowers for Dreams, I was one of two frontend developers responsible for transitioning the company's e-commerce site from VueJS to a custom Shopify theme using Liquid and JavaScript. I have also developed apps for mobile platforms including the Civic Voting Companion, a tool to enable users to easily find out who represents them in government and access voting resources, which is available on the AppStore.

These accomplishments are some of the many things which not only demonstrate my skills as a software engineer, but further illustrate my ability be constantly learning and committed to regularly improving the performance and maintainability of a platform.

I believe my skills and values strongly align with those you're looking for in your Front End Engineer and it would be a great pleasure to contribute to the ReadMe's business and culture. I would be glad to hear from you at moriarty83@gmail.com or 857-222-8356 to further discuss my skills and qualifications. Thank you very much.

Sincerely,
Christopher Moriarty
